

OPTUS

MOBILESAT

AUSTRALIA-WIDE MOBILE COVERAGE

Designed and developed in Australia, the Optus MobileSat[®] service is a world first in mobile communication. Using sophisticated Optus satellites, it provides mobile phone coverage across the entire Australian continent and up to 200km out to sea.

The MobileSat service helps overcome the isolation of distance by allowing you to make and receive national and international calls from anywhere in Australia, even while you're on the move.

If you live or work in remote areas, the MobileSat service can also provide the answer to your total mobile communication needs, with the facility for mobile facsimile and data transmission for lap tops and PCs.

The MobileSat service is your ultimate mobile communication tool, providing both increased productivity and peace of mind, wherever you are in Australia.

USING OPTUS MOBILESAT

Your MobileSat telephone can be installed in a vehicle to provide truly mobile coverage. Once installed, it is similar in appearance to a cellular car phone and includes a transceiver unit and an externally mounted antenna.

The MobileSat service is as simple to use as a standard mobile car phone, with no complex codes or radio experience required. In order to call anyone, anywhere in the world, simply pick up the handset and dial.

THE BENEFITS OF OPTUS MOBILESAT

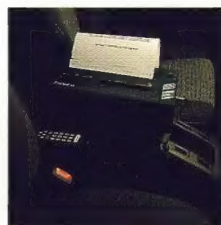

◆ **Truly national coverage.** You can be in touch wherever you are across Australia and 200kms out to sea*.

◆ **Robust and reliable.** For dependable mobile communication, designed for Australia's rugged conditions, you can rely on the MobileSat service even under adverse weather conditions.

◆ **Enhanced safety.** In an emergency, you can be confident of contacting assistance, ensuring peace of mind wherever you are. Pre-programmed emergency numbers mean help is available at the push of a button.

◆ **Clear voice quality.** The MobileSat service provides clear digital quality transmission with no static interference or crossed lines.

◆ **Cost effective communication.** When your business depends on you staying in contact, the MobileSat service makes good economic sense with its low monthly access rates and call charges.

◆ **Complete mobile office.** With its fax and data transmission capability, the MobileSat service can provide the solution to your total communication needs.

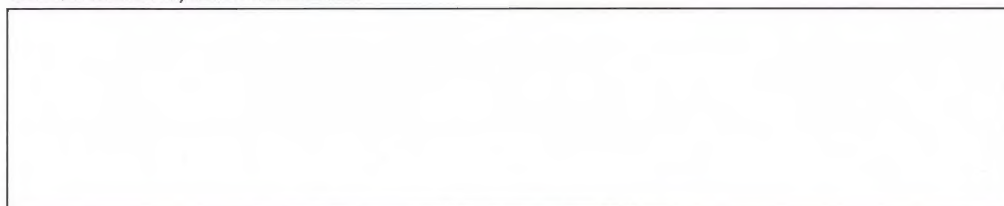

◆ **You need never miss a message.** When you can't get to your phone or it is switched off or busy, VoiceMail provides a personal answering service within your MobileSat phone, so you need never miss a message again. Provided free when you select VoicePlan with the Optus MobileSat service.

◆ **National dealer network.** Optus MobileSat is serviced and supported by an extensive network of specialised Optus Dealers nationwide.

For further information on future MobileSat services and technical specifications, please see the Technical Specifications brochure or contact your Authorised MobileSat Representative. You can also

phone Optus Sales Enquiries on: **1800 555 000.**

*Some local conditions may interfere with the service.
